

[REDACTED]

Durham

29th March 1963

Dear Tom,

Have just arrived in Durham for the L.M.S instructional conference in mathematical probability - but everyone seems to want to talk to me about the Southampton School Mathematics Project.

I called on Mrs Hall at Ripon on the way up. She has talked with her sisters but could remember no more than I got last time. She may still be of use in confirming steps in the word dance if anyone danced them for her. Her article is much too

badly smashed up for her to dance  
them herself and she seems unable  
to do them slowly.

Hope you have a good time  
in Turkey

Yours

Frank
