Dear Tom,

As you will see the marking schemes here are erratic in the extreme.

I should not like to try to explain Portsmouth in detail. Roger Regis now assesses all candidates, using test papers and extended interviews but no formal examinations.

Southampton and Weymouth are also going over to this, so I have not worried too much about Weymouth's weak standard.

Proofs of the book came this morning. I'll try to get through them this week - I go away on Aug 7th (before the post) for nearly a month. Shall I send the corrected proofs to you for correlation with your set?

Best wishes

Frank
