7 March 1965

Dear Tom,

In case you have not seen it, I enclose a copy of the report of the meeting held at C.S. House. I should like it back sometime. Have spent a hectic term. The job of polishing off the work on higher homotopy is giving a deal of trouble. I can do some of it, but can not get all the relations which I want - and in particular I can't get the out a complete account of the higher homotopy of the quotient space. Tony Armstrong should have come down from Warwick on Thursday - but snow prevented him. So not only did I have to give the seminar lecture at short notice, but also I have another week before seeing him about the publication of some results which we have both obtained.

I have been so busy that I have not been able to plan to go to Foulness. That will have to wait until next term - or

perhaps the summer. It looks as though I shall not be going to the States this next year because I applied rather late and the National Science Foundation has cut back very severely on its grants. Well - if I wait to next year I shall have more stuff in print and so shall have a much stronger application to present.

Cheers

Frank.

P.S. How are your Turkish bulbs?

My score so far this year from the Bulbo collection from Penia is *Nerandera trigyna*, + *Galanthus ikariae* subsp. *latifolius* with *Fritillaria Chloranthus* coming into flower.

7.
