15th July 1969.

Dear Tom,

I enclose two typed copies of each of the two articles on dance. I'm sorry that it has taken me so long to deal with them. The first has shortened somewhat. When I came to considering the Swedish Dance which Mike Jones had concocted out of the Chivers figures, it looked too poor to be worth including in the Magazine. I incorporated some of your corrections - thanks for the additional information and comments. Now that I've checked the typing and re-read it, I think that it would be helpful to state what the corrigenda for Three Meet was (see p 3 paragraph 1). I'm at a conference at Warwick and don't have details here. If you think that it should be done, would you write in the one sentence necessary for me?

The second article has become correspondingly longer. I hope that it has not become too long. I return 3 pages of your comments on that as you requested.

The third article was to have been on L'Union dances and Spanish Dances. For L'Union dances I would need to have more information about

occurrences of three couple figures in longways dances prior to Chivers to be able to say anything sensible. For Spanish Dances, I can only add to generally known information the two local notices - Southampton Theatre Hall for 22 Nov 1819, 'An entire new Spanish Wally for four', and Salisbury and Winchester Journal list of dancing teachers dances December 1818 including Spanish Dances. I'll have to leave that article either for you to do, or for me to work up the material again when I return to England.

When I get back to Southampton, either this weekend or next, I'll send you the copy of Chivers. I'll also send Warner again since it will be better with you than in store in Southampton. Do you still have Hankeim? If so, will you hold on to it until I return?

The last month has been quite hectic. We have been preparing to go to the States. The day is now fixed for July 29th - so long as the airline accept Janet's medical certificate. They should do since the pregnancy is going on normally and is only just beyond the point when the airline needs a certificate. We have let the house to an assistant lecturer in geography whom we

think will be a good tenant. The agreement still has to be approved by the building society, but I don't expect any trouble. I've sold the car to the garage from which I bought it. I've dropped £200 on it in the 2 years, which is not too bad - and we have the use of it up to the day before we fly out.

The conference here is going to be exhausting. There are very few of the lectures which I don't want to attend. In addition there are lots of old friends here to talk with both about mathematics and other things, and I've brought lots of papers for a grand clearing up before we leave for the States. One recent conversation brought me the good news that although Walter Sitschak (Topological Dynamics and Wesleyan University) will be on leave next year, he will spend most of his year in Middleton, so I should get plenty of conversation on research work.

Are there any N. American plants you'd like me to try to get for you? If so I'll get a licence made out for stuff to be sent to you, and send you anything in your line that I can get.

Regards to you all  
Frank.
